DETAILED ACTION

Allowable Subject Matter

Claims 1-21 are allowed.

The following is an examiner's statement of reasons for allowance: The amendments to the claims, coupled with applicant's arguments, have overcome the prior art and placed the claims in condition for allowance. As applicant notes, there is no suggestion in Siefert or Sonnenfeld to locate potential learning material from an Internet site and obtain and store data from the Internet site regarding content characteristics of the potential learning material such that the data can be compared to a learning profile of a user to identify learning material appropriate for presentation to the user. The invention works in a substantially different way from Siefert, which uses a learning profile to locate a specific appropriate numbered lesson from a computer over a network. The present invention essentially works to gather information regarding larger amounts of learning material, and then filter it using characteristic data obtained from the Internet site. Apart from Siefert and Sonnenfeld there are numerous known methods of obtaining learning material over the Internet, but there is no suggestion of a method having each of the limitations of the claimed method. As a result, the claims are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
